

Poster Presentation

Symposium 5

February 22(WED)		
Time	Title	Writer
13:30-15:30	[S5-1] Tunable optical properties of CsPb2Br5 perovskite nanocrystals and the related charge carrier dynamics	Siao-Chuan Fan (National University of Tainan)
	[S5-2] Down Conversion of Blue to White by Hybrid Color-Conversion Layers	Sung Min Cho (Sungkyunkwan University)
	[S5-3] Synthesis of bright green-emitting scheelite-structured upconversion nanophosphors	Ho Seong Jang (KIST)
	[S5-4] Nano-Structured Cylindrical Thermal Emitter for Thermophotovoltaic Devices	Young-Seok Kim (Korea Electronics Technology Institute,KETI)
	[S5-5] Fabrication of Tungsten selective emitter for Thermophotovoltaic systems by using nano-imprinting lithography.	KeumHwan Park (KETI)
