Poster Session: February 25(WED) 6:30PM~9:00PM

Simposium 9: Energy-efficient Printing and Additive Manufacturing Processes

Poster No.	Control ID	Presenter	Title
S9-1	2088510	Lee, Donggyu	Non-contacting Fixation of Living Cell by Inkjet Printing
S9-2	2096708	Vaseem, Mohammad	Highly Conductive Metallic Cu-phase: Microwave-Irradiated Green Route Reduction of CuO Quantum Dots Ink Supported on Flexible Substrates
S9-3	2113704	Wang, yousheng	Optimization of Printing Parameters for Directly Drawn ZnO Printed Line based Field Effect Transistors (FETs) via Nozzle Jet Printing
S9-4	2114067	JEONG, Haneul	Study to Expand the Possibility for Printed Perovskite-based Solar Cells
S9-5	2125482	Bae, Il-Ji	Structural Optimization of Cyan Organic Light emitting diode for hybrid WOLEDs
